prop-130-v003: Modification of transfer policies

- Possible difficulties in verifying mergers, acquisition, reorganization, or relocation when transferring out of APNIC region due to unfamiliarity of languages and legal frameworks in other RIR regions. May require cross RIR coordination.
- For cases of partial IPv6 transfers, may result in Whois registration of IPv6 allocations that are more specific than /32.

prop-130-v003: Modification of transfer policies

- APNIC's current systems are not configured to handle inter-RIR IPv6 reverse DNS. This will need to be developed.
- APNIC cannot predict when other RIRs will support IPv6 reverse DNS fragments to their systems.
- Implementation
 - 3 months, except for inter-RIR IPv6 reverse DNS.

prop-133-v003: Clarification on Sub-Assignments

- This proposal appears to be straightforward. APNIC notes the simplified policy text and it is unlikely to change current practices for evaluating resource requests.
- Implementation
 - within 3 months.

2021 APRICOT APNIC 51

ONLINE

22 February – 4 March 2021
